YaraLiva™ NITRABOR™

YaraLiva NITRABOR	% w/w
Total Nitrogen (N)	15.4
Nitrate	14.1
Ammonium	1.3
Calcium (Ca)	18.3
Boron (B)	0.3

Product Performance

YaraLiva NITRABOR offers water soluble calcium for improved growth, reduced stress, better crop quality and shelf life along with readily available nitrate nitrogen for rapid growth.

YaraLiva NITRABOR also contains boron, when applied with calcium, there is often a positive synergy. Boron has been shown to improve calcium movement in the plant, reducing the risk of localised calcium deficiency. Adequate boron also encourages healthy roots improving overall nutrient uptake efficiency.

Unique Coating Technology

YaraLiva NITRABOR utilises a unique coating technology. Distributed evenly on the granule, this coating ensures the fertiliser resists the absorption of moisture during storage and handling. Tests show that the coating can reduce the rate of water absorption by 99% compared to untreated calcium nitrates. When in contact with moist soil or after a nights dew, light rainfall or irrigation, YaraLiva NITRABOR is quick to breakdown and release the fast-acting nutrition.

YaraLiva NITRABOR offers a low risk of scorch and is often used as a final top dressing to a wide range of high value crops that have a requirement for extra boron.

Benefits

- Free flowing, dense granular fertiliser for accurate dry applied spreading.
- Supplies readily available nitrogen, boron and calcium for high yields and superior quality
- Unique coating reducing moisture absorption during handling and storage, making field application easier
