Consistency

YaraMila COMPLEX contains balanced and efficient nutrition in every prill. In addition to nitrogen, phosphorus and potassium, YaraMila COMPLEX also contains calcium, magnesium, sulphur and micronutrients.

Balanced source of nitrogen

YaraMila COMPLEX includes a balance of nitrate and ammonium nitrogen, making the products significantly more effective than urea of ammonium based fertilisers per unit of nitrogen.

Unique phosphate

Yara's nitrophosphate production process gives YaraMila products a unique combination of polyphosphates and orthophosphates. These forms give greater availability of soluble phosphate to crops over a wide range of soil types.

Potassium

YaraMila COMPLEX is based on potassium sulphate, targeted for use on cash crops. This chloride free source of potassium gives superior quality compared to standard potassium chloride based NPK's.

Superior Handling

YaraMila COMPLEX prill is specifically designed to allow easy and accurate spreading by machine or hand.

Benefits:

- Balanced nutrition in every prill supports better nutrient uptake and plant growth
- Uniform prill fertiliser that has low dust, excellent handling and spreading characteristics for consistent application
- Rapid nutrient release to satisfy requirements of quick growing, high yielding crops
- Safe to use on sensitive crops as product is chloride free.
