YaraVita™ BRASSITREL PRO™

YaraVita BRASSITREL PRO is a balanced combination of essential micronutrients, especially suitable to vegetable, canola and leguminous field crops. YaraVita BRASSITREL PRO is designed to meet the full micronutrient requirement of the crop regardless of the soil nutrient status.

Guaranteed Analysis

Calcium (Ca)	8.9% w/v	89 g/L
Manganese (Mn)	7.0% w/v	70 g/L
Magnesium (Mg)	7.0% w/v	70 g/L
Nitrogen (N)	6.9% w/v	69 g/L
Boron (B)	6.0% w/v	60 g/L
Molybdenum (Mo)	0.4% w/v	4 g/L

Features & Benefits

The fluid formulation makes it easy to measure, pour and mix the product in the spray tank, while giving the highest nutrient content.

The purity of raw materials selected for this product makes it safe for application to the crop and helps ensure that the harvested produce will not be rejected at any point in the supply chain.

A controlled particle size gives quick uptake and long lasting effect. This reduces the need for repeat applications saving both time and money.

A broad tankmixability makes it easy to co-apply the products with agrochemicals, saving both time and money. Just as important, free access to Tankmix information online (www.tankmix.com) or via smart phones makes it quick and easy to check whether products can be co-applied.

Why Foliar Apply?

Foliar sprays ensure precise application of the right nutrient mix at the right time, and can be specifically targeted to the leaf or fruit, to suit an immediate crop need.

Foliar application also provides nutrients for immediate uptake by the leaves or fruits. As a result, the grower is not reliant on the right soil, pH or growing media conditions and can quickly put the crop back on course.

Recommendations for use

Always consult the product label before use.

Crop	Application Recommendation	Water Rates (l/ha)
Beans, Peas	3 - 4 l/ha as early in the growing season as possible, provided there is adequate leaf cover to intercept the spray (e.g. 4 - 6 leaf stage). Repeat as necessary at 10 - 14 day intervals up to flowering. N.B. Do not spray during flowering.	200
Brassicas	3 - 4 l/ha as early in the growing season as possible, provided there is adequate leaf cover to intercept the spray (e.g. 4 - 6 leaf stage). Repeat as necessary at 10 - 14 day intervals up to one month before harvest	200
Canola	3 l/ha at the 4 - 9 leaf stage and again at the onset of the rapid stem extension phase up to the start of flowering.	50 - 200
Capsicums, Tomatoes (Field Grown)	3 l/ha at the 4 - 6 leaf stage. Repeat at 10 - 14 day intervals as necessary. N.B. avoid application during flowering.	200 - 500
Carrots	3 l/ha when crop is 15cm tall. Repeat at 2 week intervals.	200
Celery	3 l/ha at the 4 - 6 leaf stage. Repeat if necessary 10 - 14 days later.	200
Cucumber (Field Grown)	1 - 2 l/ha when sufficient leaf area to intercept spray.	50 - 200
Cucurbits (Field Grown)	3 l/ha sprayed at the 4 - 6 leaf stage. Repeat at 10 - 14 days interval up to flowering.	200 - 500
Garlic, Leek, Onion	3 l/ha applied as soon as there is adequate leaf cover (6 leaves) and then repeated at 2 weeks interval.	200
Lettuce (Field Grown)	3 - 4 l/ha as early in the growing season as possible, provided there is adequate leaf cover to intercept the spray (e.g. 4 - 6 leaf stage). Repeat as necessary at 10 to 14 days interval up to one month before harvest.	200
Maize/ Sweetcorn	3 l/ha at the 4 - 8 leaf stage and repeat at 10 - 14 days interval as necessary.	200
Potatoes	3 l/ha applied one week after 100 percent emergence. Repeat at 10 - 14 days interval as necessary.	200
